Skills

Programming Languages: Python, R language, SQL, C++.

Data tools: Excel, Orange Data Mining, Power BI.

Technical skills: API development, Big data with PySpark, Dashboards development, Data analysis, Machine learning models, Natural Language Processing, Web scraping.

Soft skills: Autonomy, Communication, Continuous learning, Organization, Proactivity, Problem solving, Teamwork.

Languages: English, Portuguese.

Experience

Mid-Level Data Analyst, Observatório FIESC

May 2025 - Present

- Responsible for updating and validating macroeconomic indicators from government databases, such as labor movement, foreign trade, and central bank expectations, which feed the company's products.
- Lead the maintenance and support of all the company's data products following a layoff.
- In charge of preparing and reviewing documentations of data products.
- Conduct and document the development of ETL and data analysis scripts using R language, Python, PySpark, and Databricks.

Data Science Freelancer, Whiskystats

November 2023 - Present

- Work on-demand on short-term web scraping and data analysis projects with R language.
- Scraped 14 websites, representing 3 market indexes pages, 2 reviews websites and 9 auction houses.
- Contributed to the addition of 545 auctions, more than 370,000 lots and more than 9,000 reviews to the company's database.
- Analyzed data from a specific auction house, looking for consumption patterns of its buyers and validating the hypothesis of large buyers influencing the market.

Jr. Data Scientist, WEG

April 2024 - April 2025

- Worked on a main project, focusing on the analysis and definition of prediction factors, comparing laboratory test data with theoretical calculation values.
- My work represented the first steps to the future development of a calculation optimizer for permanent magnet motors, with the potential to save millions by anticipating design errors.
- Contributed to the development of an API to support the calculation of induction motors, being responsible for the noise prediction route.

Education

Data Science Academy

In progress

Postgraduation in Computer Vision

Fundação Getúlio Vargas

September 2024

Postgraduation in Business Analytics and Big Data

Grade: 8.92

UniCesumar

April 2024

Bachelor of Science in Economics

Grade: 8.81

Universidade Estadual de Maringá.

June 2023

Bachelor of Science in Electrical Engineering

Grade: 9.10
